As far as I am concerned, 2 hams operating from the same location at different times should be both counted. But the problem I see is that if the same place is hit 20 times where would there be an advantage? I would count it this year, but next year keep it to one activation. That seems fair.

I was a liaison to NTS as I sent a message to our Section Manager Pete Cecere and to Mike Corey at the ARRL via NTS on behalf of the entire District. Also, I know that N2SQO checked in with you as my liaison to each county. Don't forget I am a member of your group too. So, yup!

Yes add the points for submitting the form in your total. Yes include the check in points too.

Here's the bottom line, it doesn't make too much difference how you do some of the bookwork as you are only in competition with yourself. Just do it the same year after year so that you have a way to see if you are gaininng or loosing ground. As it turns out you guys are way above every other county. You are 2x Saratoga and 3x Albany. So fantastic job.
